A OKIOCAM overview

Firmware update available!

The new OKIOCAM S firmware gives all the buttons on your OKIOCAM predefined functions and enables them to work in third-party apps such as Zoom, Google Meet, Microsoft Teams, and many more.

If the buttons on your OKIOCAM do not function as outlined in the image at the top of the next page, please update its firmware to the latest version. OKIOCAMs purchased after late-January 2021 come with the new firmware pre-installed, but those purchased earlier will need to be updated. Please download the firmware update to check that you have the latest version installed and to update if necessary.

The firmware update can be downloaded here:

www.okiolabs.com/download

B Installing OKIOLAB Snapshot and Recorder

Please download OKIOLAB Snapshot and Recorder from www.okiolabs.com/download. You can use Snapshot and Recorder to take snapshots and videos with your OKIOLAB.

C Using Snapshot and Recorder with your OKIOLAB

- Take a snapshot by clicking on the  icon.
- Start a video recording by clicking on the  icon.
- Click the  icon to pause and the  icon to end the video recording.
- Enter Review Mode by clicking the  icon. From here you can view your previously taken snapshots and videos.
- Use the Zoom slider to control the level of zoom between 1x and 6x.
- Click the Rotate arrows to rotate the camera clockwise and counterclockwise.
- Use the Exposure slider to adjust the level of exposure.
- Press the  icon to freeze the camera feed.
- Press the  icon to adjust the camera's focus, exposure, and white balance automatically.
- Press the  icon to reset the camera.

D Introduction to the OKIOCAM Education Kit

In addition to OKIOCAM Snapshot and Recorder, the OKIOCAM Education Kit also includes other awesome software. Use OKIOCAM Stop Motion and OKIOCAM Time-Lapse to make ultracool stop motion and time-lapse videos! You can improve your productivity and save bags of time with our Google Chrome add-ons for Docs, Sheets, Slides, and Forms, too!

Go to www.okiolabs.com/download to download all our software.

Stop Motion

Time-Lapse

E OKIOCAM + third-party software

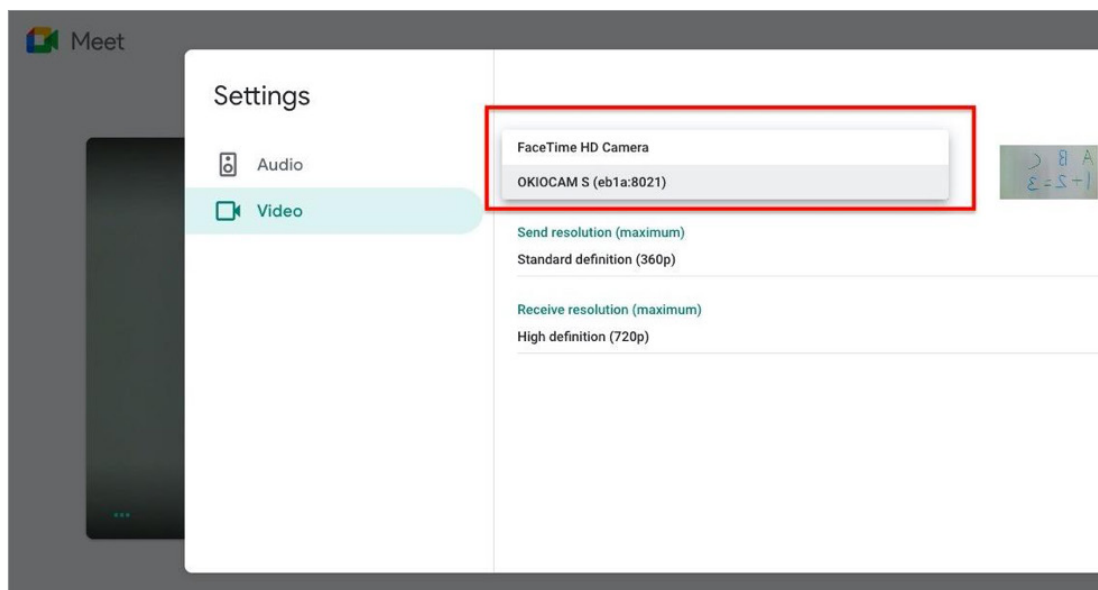

Top tip

When using third-party apps, if you are seeing mirrored video, don't worry, your OKIOCAM is not faulty. Most video conferencing apps will mirror your camera in the preview window by default. However, anybody who you are transmitting your video to will see the non-mirrored video.

OKIOCAM works with all the most popular video conferencing apps and learning apps. Here's how you can get up and running with some of them:

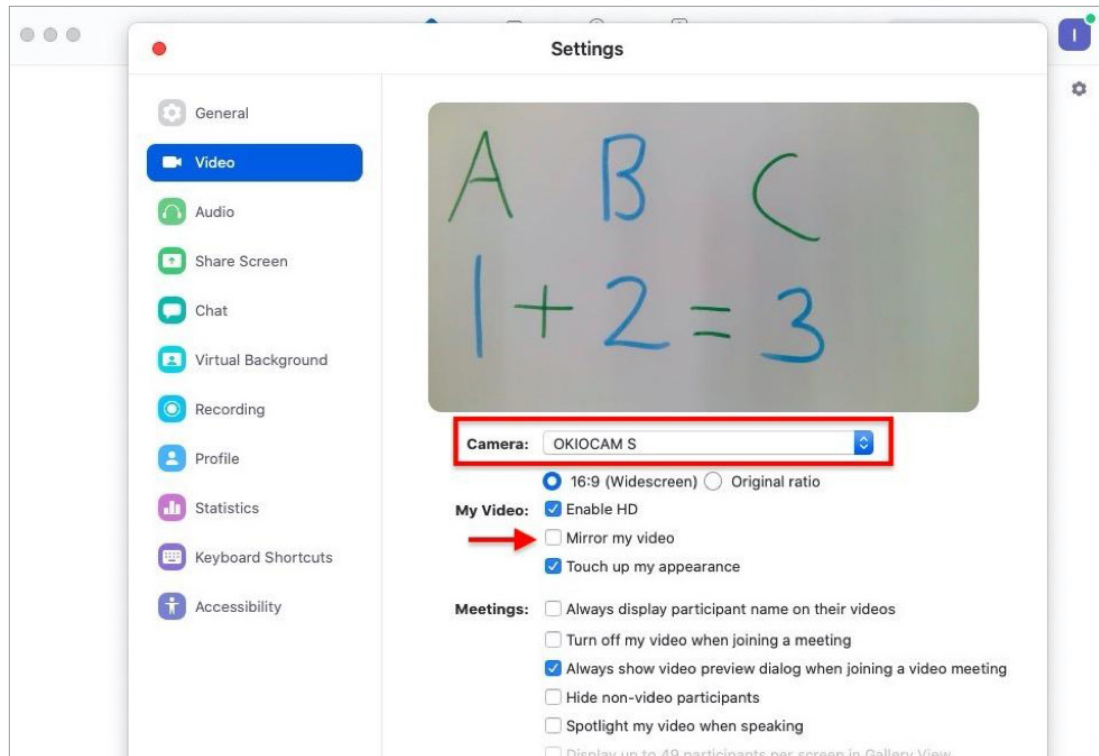

Video conferencing apps:

Google Meet

- 1 Click the **More options** icon in the bottom right-hand corner.
- 2 **Settings**.
- 3 **Video**.
- 4 Select **OKIOCAM** from the **Camera** drop-down menu.

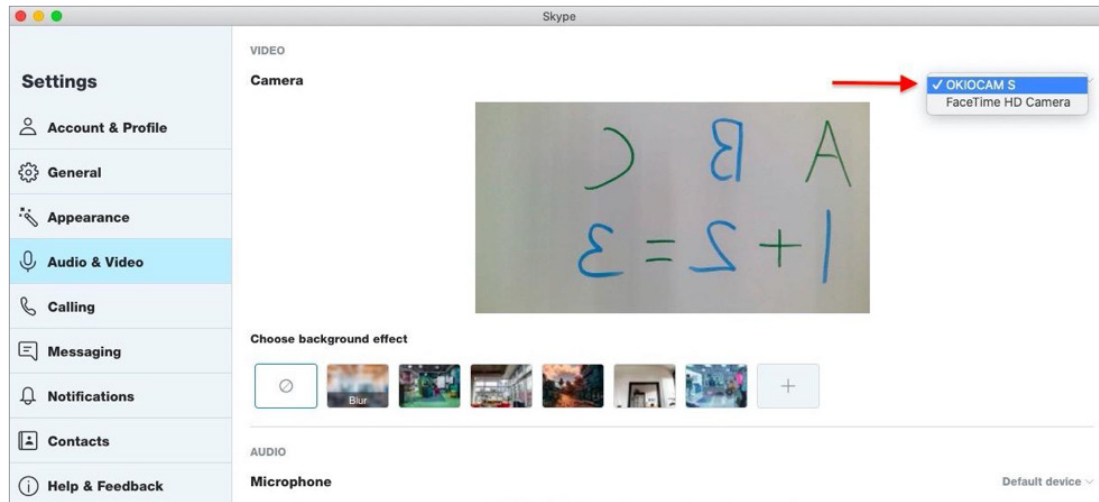

Zoom

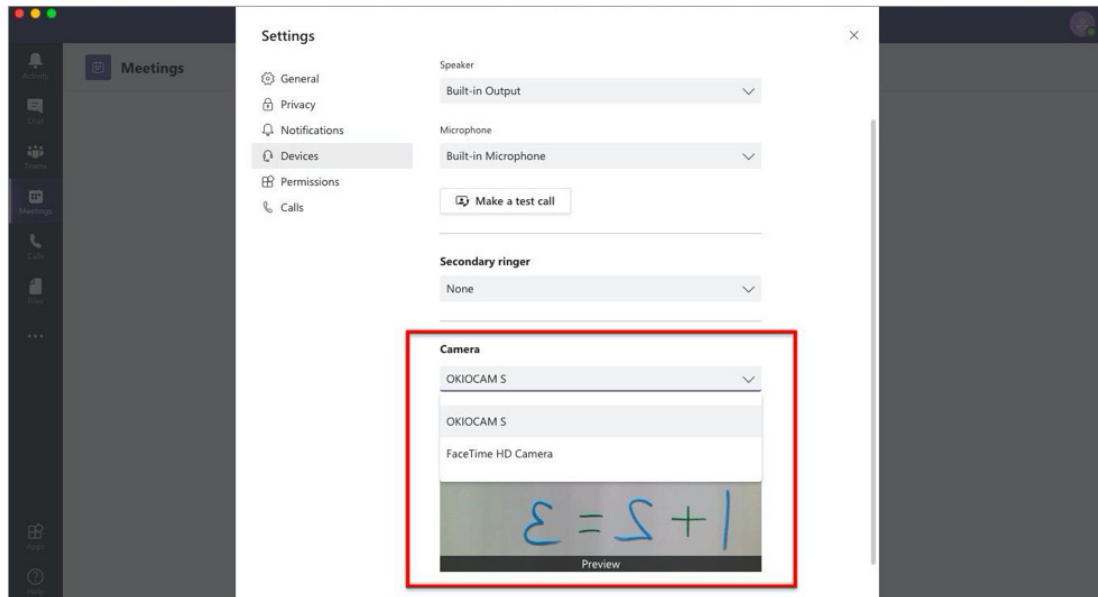

- 1 Click the **Settings** icon in the top right-hand corner.
- 2 **Video.**
- 3 Select **OKIOCAM** from the **Camera** drop-down menu.

To turn off video mirroring,

- 1 Click the **Settings** icon in the top right-hand corner.
- 2 **Video.**
- 3 Deselect **Mirror my video.**

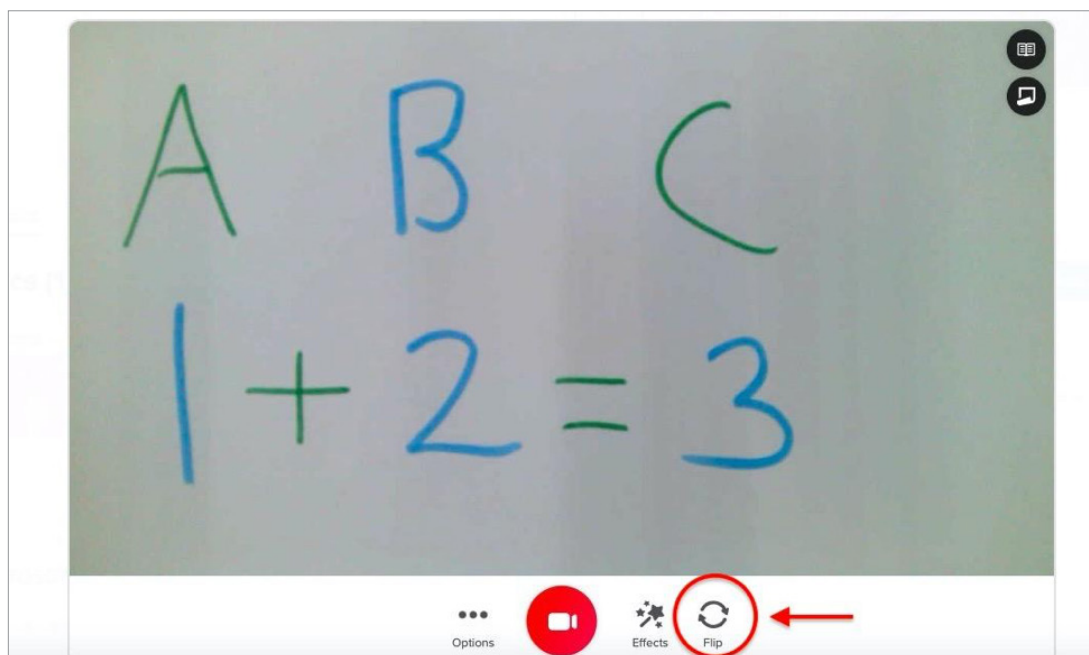

- 1 Click the **More options** icon in the top left-hand corner.
- 2 **Settings.**
- 3 **Audio & Video.**
- 4 Select **OKIOCAM** from the **Camera** drop-down menu.

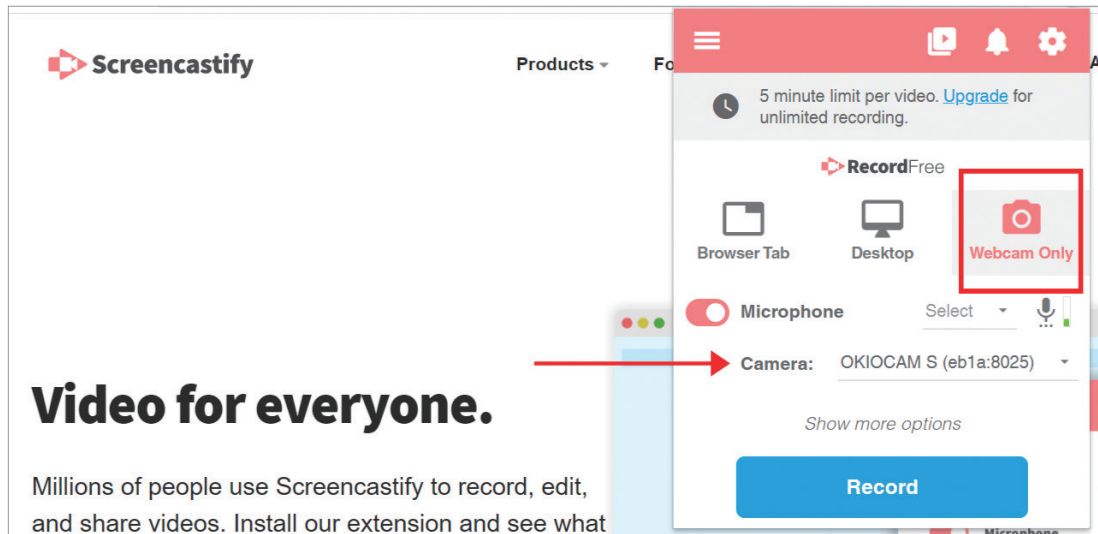

Microsoft
Teams

- 1 Click the **Profile** icon in the top right-hand corner.
- 2 **Settings.**
- 3 **Devices.**
- 4 Select **OKIOCAM** from the **Camera** drop-down menu.

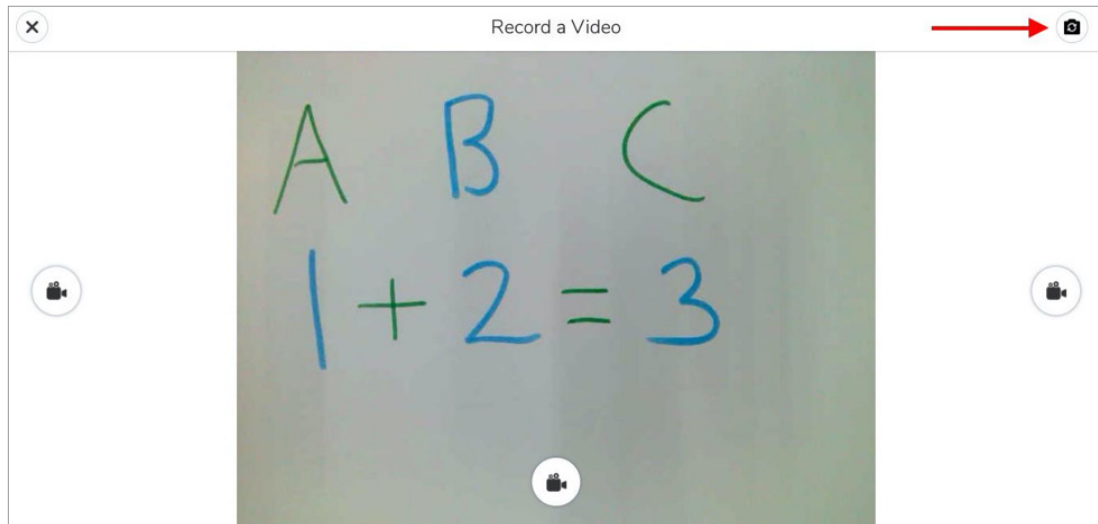

Learning apps:

- 1 On the Create a New Topic page, click on the **Record a Video** icon.
- 2 Switch to your OKIOCAM by clicking on the **Flip** icon.

- 1 Click the **Webcam Only** icon.
- 2 Select **OKIOCAM** from the **Camera** drop-down menu.

- 1 On the Create New Activity page, click on **Add Multimedia Instructions or Example**.
- 2 **Video.**
- 3 Switch to your OKIOCAM by clicking on the **Camera** icon in the top right-hand corner.
