OKIOLABS A10 Overview

The OKIOLABS A10 is a plug-and-play webcam. You do not have to download or install any drivers.

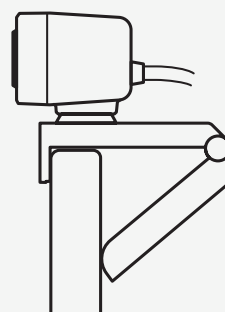

In order to use your OKIOLABS A10, you will need to use it with either OKIOCAM software or third-party applications. It is compatible with all major third-party applications including but not limited to Google Meet, Microsoft Teams, and Zoom.

Setting-Up

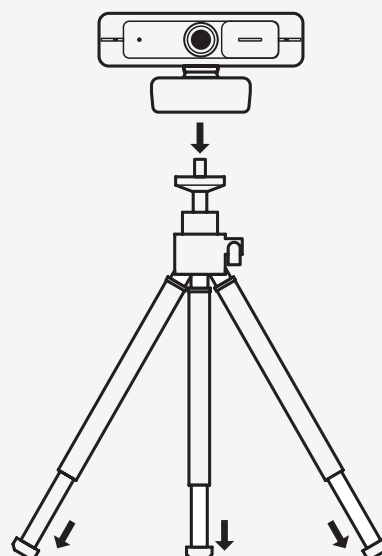

- **Option A: With Laptop/Monitor**

- Unfold the clip and place the webcam on the top of your monitor or laptop screen. Secure the OKIOLABS A10 by adjusting the clip to press against the back of your device.

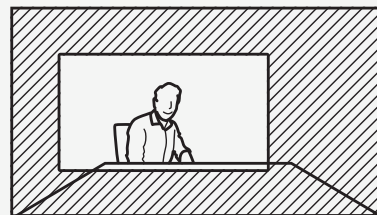

- **Option B: With Tripod**

- Fold the clip in and mount the webcam onto a tripod with the 1/4 inch standard tripod thread. (Tripod is included with the purchase of OKIOLABS A10.)
 - The tripod extends by twisting and pulling on the end of each leg.
 - The unextended tripod has a height of 5.7in/14.5cm.
 - The extended tripod has a height of 8in/20cm.

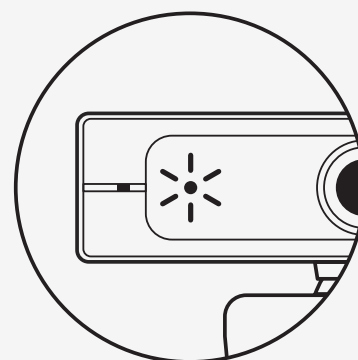

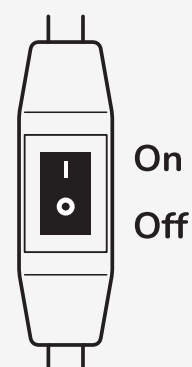

AI Auto Framing

- The OKIOLABS A10's Auto Framing function brings an in-person experience to your virtual meetings. The AI technology smartly adjusts the frame depending on the location and number of participants in order to keep everyone at the center of the frame and all in one picture.

- The AI Auto Framing feature only supports up to 1920x1080P.
- To turn on the AI Auto Framing Function simply switch the button on the provided USB cable to the "I" input position.
- LED light on the front of the OKIOLABS A10
 - Blue: The AI Auto Framing function is **on**.
 - Green: The AI Auto Framing function is **off**.
 - No light: The OKIOLABS A10 is **off**.

Connecting to your Computer

In order to connect your OKIOLABS A10 to your computer, you must allow it access to function.

- **Windows:**

- Setting
- Privacy
- Camera and switch on **Allow access to your camera.**
- Select each application that you want to use your OKIOLABS A10 with.

- **macOS System:**

- Apple menu
- System Preferences
- Security and Privacy
- Camera from the left side of the screen
- Select the applications that you would like to give camera access to by checking the respective box.

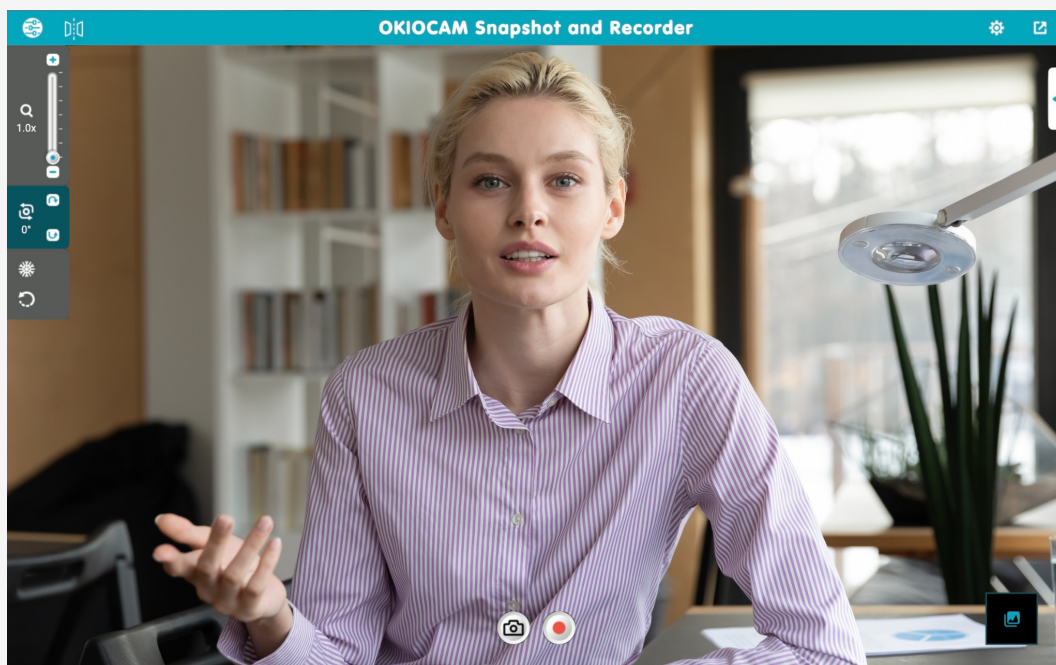

- **Chromebook Camera:**

- Open the native camera app.
- Click the button in the lower-left corner.

OKIOCAM Snapshot and Recorder

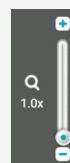

You can download OKIOCAM Snapshot and Recorder at www.okiolabs.com/download.

You can use Snapshot and Recorder to take snapshots and record videos with your OKIOLABS A10.

• Dashboard

- Click the  icon to take a snapshot.
- Click the  icon to start recording a video.
- Click the  icon to pause the recording.
- Click the  icon to stop the video recording.
- Click the  icon to mirror your image.
- Zoom Slider:
The top slider on the left side of the screen allows you to zoom up to 6.0x the normal view.

- Click the  icons to rotate the image.
- Click the  icon to freeze the camera feed.
- Click the  icon to reset the camera.
- Click the  icon to access the photo and video gallery.

To open the **Settings**, click the  icon at the top right side of the screen.

● General Settings

- Choose your desired camera, from the **Camera** dropdown menu.
- Choose your desired resolution for photos from the **Resolution** dropdown menu.
- The **Focus Sound** feature is not applicable for the OKIOLABS A10.
- Choose where your images and videos are saved by clicking **Change** beside **Library Folder**.
- Choose your desired language from the **Language** dropdown menu.

General Settings	
Camera	OKIOLABS A10 (342e:0007) ▼
Resolution	640x480 ▼
Focus Sound	On ▼
Library Folder	/Users/THChan/Desktop/OKIOLABS Files Change
Language	English ▼

● Video Recording Settings

- Choose between two different recording aspect ratios from the **Aspect Ratio** dropdown menu. (4:3 and 16:9)
- Choose your desired video recording resolution from the **Quality** dropdown menu.
 - When recording a video with a 4:3 aspect ratio your resolution options are 1024x768 and 1600x1200.
 - When recording a video with a 16:9 aspect ratio your resolution options are 1280x720 and 1920x1080.
- Choose the microphone that you want to record the audio with from the **Recording Mic** dropdown menu.
- Adjust the microphone volume with the slider labeled **Mic Volume**.
- Set the **Display when recording** setting to the on position () if you want to have the ability to adjust the microphone volume directly from within the Live View when recording, and set it to the off position () if you do not.

Video Recording Settings	
Aspect Ratio	16:9 ▼
Quality	High (1920x1080) ▼
Recording Mic	Default - MacBook Pro Microphone (Built-in) ▼
